INTRODUCTION

This is a first effort by the Federal Bureau of Prisons Library to develop a comprehensive bibliography of recent publications relating to the field of correctional education and training.

Correctional education and training is a rapidly growing field of interest. Many currect publications are in mimeograph form, published as reports and evaluations of experimental-demonstration-pilot programs financed in part or completely by various federal agencies.

Unless otherwise indicated publications are available on inter-library loan to state and federal agencies.

We regret that we are not able to provide copies of periodical articles.

The Library of the Federal Bureau of Prisons is interested in receiving copies of any studies which could appropriately be listed in revised editions of this bibliography. Please use the form provided in the back of this bibliography to transmit additional publications to our attention.
